PREVALENCE AND ANTIMICROBIAL RESISTANCE OF *Vibrio* spp. IN RETAIL SHRIMP IN HANOI, VIETNAM

VU THI THU TRA

A THESIS SUBMITTED TO CHIANG MAI UNIVERSITY AND FREIE UNIVERSITÄT BERLIN IN PARTIAL FULFILLMENT OF THE REQUIREMENTS FOR THE DEGREE OF MASTER OF VETERINARY PUBLIC HEALTH

CHIANG MAI UNIVERSITY AND FREIE UNIVERSITÄT BERLIN SEPTEMBER 2013
ACKNOWLEDGMENTS

First of all, I would like to acknowledge The United States Agency for International Development (USAID) for awarding me scholarship to attend master course of Veterinary Public Health at Veterinary Public Health Centre for Asia Pacific (VPHCAP), Chiang Mai University and Faculty of Veterinary Medicine, Freie Universität Berlin. It was a great opportunity for me to have insights and improve knowledge on Veterinary Public Health.

I would like to express my deep gratitude to my supervisors Prof. Dr. Thomas Alter, Institute of Food Hygiene, Freie Universität Berlin and Assist. Prof. Dr. Duangporn Pichpol, Faculty of Veterinary Medicine, Chiang Mai University for their continuous guidance, support and encouragement during my entire study period. I would like to extend my appreciation for my country supervisor Dr. Pham Hong Ngan, vice dean of Faculty of Veterinary Medicine, Hanoi University of Agriculture for providing me with valuable advices and support throughout the research work in Vietnam.

I would like to sincerely thank Dr. Stephan Huehn, Institute of Food Hygiene, Freie Universität Berlin for laboratory training during study time in Berlin and guidance throughout research study. I am very much thankful to Dr. Maximillian Baumann for his suggestions during field work. I am also grateful for laboratory arrangement of Dr. Tongkorn Meeyam.

I sincerely appreciate the National Center for Veterinary Hygiene and Inspection No. 1 (NCVHI 1) as well as National Institute of Hygiene and Epidemiology (NIHE) for laboratory facility, especially Dr. Bui Thi Phuong Hoa, Director of NCVHI 1; Dr. Huynh Thi Thanh Binh, Head of the Microbiology section of NCVHI 1 and Dr. Hoang Thi Thu Ha, Bacteriology Department of NIHE.
My appreciations are to all my lecturers and colleagues at Chiang Mai University, Freie Universität Berlin and Veterinärmedizinische Universität Wien for their knowledge and cooperation. I am also thankful to all my friends in fifth batch of the Master of Veterinary Public Health for friendship and experience sharing.

Lastly, I would like to express my deepest gratitude to my beloved family, my husband, my son and my parents who always love and encourage me to keep towards the study and research as well.

Vu Thi Thu Tra
